

The Future of Outdoor Entertainment

Stealth Acoustics

## Introducing Stealth Patio Theater (SPT)

SPT is a complete outdoor cinematic entertainment solution combining large format ultra-bright, motorized LED screens with Stealth Acoustics' award-winning outdoor speaker and amplifier technologies - all to create a unique and fun outdoor movie experience.

SPT is available in virtually unlimited configurations to meet the exact needs of your outdoor space, including fully-customized systems designed, engineered and detailed by Stealth.

### The Envy of the Neighborhood

Entertainment lifestyles are moving out-of-doors and SPT systems are specifically designed for outdoor use, reliably reproducing vibrant images even in broad daylight.

SPT provides dynamic, full-range, multi-channel surround sound to recreate the movie theater experience in your backyard. Stealth's award-winning outdoor StingRay™ loudspeakers and subwoofers coupled with Stealth amplification and Digital Signal Processing provide realistic and highly-immersive cinematic sound reproduction.

Custom enclosure options available.

Ultra-quiet lift mechanism.

Weatherized assembly.

Multiple pixel pitches available.

Super bright LED screen designed for maximum visibility – even in full daylight.

## Impressive Engineering and Hardware

Stealth Patio Theater's rugged outdoor LED screens are custom-built to order in the required sizes, resolutions and brightness's using the latest in advanced LED screen technology and control software.

SPT custom screen enclosures are engineered to fill functional, environmental and aesthetic goals. Enclosure options range from above-ground cabinets to subterranean vaults and may be built to match existing outdoor décor or to disappear into the environment.

World-class motorized lifts cause SPT to magically and quietly rise from its enclosure and retract safely for storage, adding to integration elegance and excitement.

Fully scalable  
LED screen  
can be built to  
almost any size.

Stealth  
Environmental  
Speakers and  
Amplifiers  
included.

## Flexible System Architecture

SPT is highly scalable and flexible. Using standards-based technologies, coupled with Stealth's proprietary designs, SPT incorporates a custom system processor which provides system configuration and media playback from an internal

BluRay disc player, local / network digital files and cloud content via Stealth's dedicated media player software. SPT is easily expandable to accommodate any legacy content sources and is compatible with all major control systems.
